Subject: Request for Information, re: November 2020 election.

Since it has now been established that Haywood County voting officials used the voting machines made by Election Systems & Software (ES&S) that contain the secret modem, I would like to request public information about these voting machines.

See the links on www.haywoodtp.net ...

[It has now been established \(re: NCSBE\) that Haywood County used the voting machines made by Election Systems & Software \(ES&S\) that contain the secret modem by Telit \(LE910-SV1\) embedded in the voting machines motherboard in the last election. 4/14/2021...](#)

[Investigators for Attorney DePerno Reportedly Discover Modem Chips Embedded in Michigan Voting System Computer Motherboards. 4/14/2021...](#)

[BOMBSHELL: Investigators Discover Modem Chips Embedded in Michigan Voting System Computer Motherboards, By Pamela Geller - on April 11, 2021, The Geller Report. 4/14/2021...](#)

- Please provide the exact number, Model Numbers, and Serial Numbers of all of the equipment Haywood County is in possession of that was manufactured by Election Systems & Software (ES&S).
- Please provide where these machines were placed during the November 2020 election.
- Please provide the secret access via the Telit modem.
- Please provide the daily voting totals for each machine at each location on a daily basis for the November 2020 election.

Additionally, try again at responding to my previous request on April 5, 2021, this time with a little more clarity and detail.

- Whose ballots had the VRN, or any other number, printed on them, out of the 36,692 voters in the November election?
- Who designed the software that was loaded onto the local voting machines? What was the version number used during the election.
- What software was used to transfer vote tabulation data from Haywood County to the State?
- What election officials, outside of Haywood County have access to how people voted on their ballots?
- Is voting information transferred over the Internet?
- If so, what is the level of encryption used?
- When is the last time Haywood County Voter Registration data was purged for dead people, people that have moved out of the county, any other factor that would render them ineligible to vote?
