Subject: Big win for residents of Buchanan Drive v. Browning Branch LLC.

Looks like a big win for the residents of Buchanan Drive verses -

- Browning Branch LLC,
- NCDOT,
- Town of Waynesville Planning Board.

Pavers arrived last week to pave the entrance to Browning Branch LLC. These photos were taken this morning. Although I have not spoken to any of the residents up Buchanan Drive, it would appear that their gravel road has been left intact, completely separated from the Katka Loop road, and separated by a decorative collage of gigantic boulders. Someone must have put their noggins together to come up with this final driveway plan. Here are a series of photos...

Buchanan Drive (gravel) on the left, Katka Loop (paved) on the right. Boulders separating the two roads. Looks like some kind of survey marker (orange tape) where the trees end and boulders begin, with the distance being about equal between the marker / trees / boulder. Seems reasonable to me.

More photos continue...

Jeff Stines dead road sign is still laying on the ground.
